

Engineer's Assistant

Based near Callington

Working Hours: Mon – Fri, could include early starts (6am) and late finishes (8pm)

Salary: Dependent on experience

Responsible to: Field Engineer

Key Duties:

- Assisting the Engineer with setting up and running equipment for stress testing various poles and posts, e.g. telegraph poles.

This role will be based from Bray Shop, but covering Cornwall and Devon. The Engineer will drive but you must have transport to get to meeting points each day (usually Bray Shop). This is not on a public transport route.

Knowledge & Skills

- Numerate & Literate
- Physically fit as this role involves lifting and setting up equipment
- Ideally experience of manual/outdoor work in a similar type of role
- Understanding of Health & Safety / Manual Handling

This is an ongoing temporary role. The client is hoping to find a candidate who is happy to work on an ongoing, regular basis.

Start date on or around 18th May 2009.
