

Recycling Manager / Field Manager

Farm Contractors who specialise in recycling wastes to land, in particular septic waste, digestate, food waste and green waste.

We are looking for a practical “hands-on” person who also has a good understanding of the Environmental Permitting Regulations and knowledge of the local area and rural community to take the business forward.

Job Role:

Continue to build and maintain relationships with existing clients
Develop new leads and investigate business opportunities
Take a leading role in the submission of tenders
Source landbank for waste products
Undertake deployments and other permitting submissions
Manage waste to land operations
Manage the existing compost site including PAS 100 certification

In addition the role will involve:

Lime testing and sales
Involvement with promotional activity and shows

Person Specification:

Flexible attitude to the range of jobs required of the role
Must be an excellent communicator at all levels within the company and external partners and clients
Experience in agronomy, specifically nutrient management
FACTS qualified
Ability to interact well with farmers
Excellent computer skills
Must be able to self-manage and organise own workload

- *This role may be either part-time or full-time depending on what the candidate can offer.*
- *Excellent salary*
